Version history

Date	Version	Description
2.1.2018	1.0	First release concerning the 2018 taxable year.
14.11.2018		The due date was corrected to 4 February 2019 (previous version had 5 Feb).

1 INTRODUCTION

This guidance explains the structure of the required inbound file and the check procedures that follow. For more information, see [tax.fi > About us > Information and material on taxation > IT developers > e-Filing guidance > Electronic filing of information returns General description](#).

2 DESCRIPTION OF THE INFORMATION FLOW AND SUBMITTAL OF FILES

Create your filing as instructed in this section to report the required information on the employer or payor. It is mandatory to include a contact person's name and telephone number whenever amounts of money have been paid to someone and you report information on the employer or payor. Give the payor-specific information once in a calendar year only.

For more information and instructions, go to the 'Annual Information Returns' pages of the Website, > Forms > Annual information.

For more information on how filers must identify themselves electronically, on the requirements on Katso ID and Katso Role, and on the information flow's check routine for authorizations, click [here](#).

2.1 Name of the software that produced the file – Data element 014

This data element (014) is mandatory, for purposes of identification, in the VSPSERIE, VSPSERIK, VSPSKUST, VSRAERIE and VSPSVYHT annual information flows.

In the future, the entry in 014 must contain the Business ID of the software provider company and two additional control characters. An underscore is required between the Business ID and the control characters. For the Business ID, it is mandatory to follow the exact format. The control characters are intended for the software provider company, so they can identify their software product according to their own needs.

The format of the name of software (014) data element is the following:
Y-TUNNUS_AN2 (12 characters in total)

Example:

The provider of the "AccountingPro" software application has 6606611-7 as its Business ID. The provider not only sells "Accounting Pro" but also another application called "PayrollPro".

The entry in this data element should be:

014: 6606611-7_AP (Accounting Pro)

014: 6606611-7_PP (Payroll Pro)

If the software company does not have a Finnish Business ID, the dummy value 0000000-0 is permitted, for example, you can enter: 0000000-0_U1.

If the software is developed independently by the payer reporting the annual information, enter the Business ID of the payer company in this field. Add control characters as appropriate.

3 MAKING CORRECTIONS

For more information, see [tax.fi > About us > Information and material on taxation > IT developers > e-Filing guidance > Making corrections to e-filed submittals of information returns.](#)

Please note the special requirement regarding this information flow:
We recommend that when making corrections, filers use the same information flow, and the same software, as they used for the original submittal.

4 PERIOD OF VALIDITY

This specification sets out the requirements of file formatting that come into force 25 January 2018 and continue to be in force until a new version of this specification is released.

Due date for filing is 4 February 2019.

5 COMBINED INFORMATION FLOWS

You may send us the following flows in the same computer file as you are sending your VSPSVYHT flow:

- VSRAERIE
- VSPSERIE or VSPSERIK+VSPSKUST
- VSRAERIE

10 EXAMPLE

The example represents the payor-specific section of the Employer Payroll Report, VSPSVYHT (000), created by the Accounting Pro software application. The filing concerns the 2018 Year of payment (058) and the employer's business ID is 1234567-9 (010), the contact person's name is JOHN SMITH (041) whose telephone number (6042) is 09123456, deductions made from the health insurance contribution are 150 euros and 44 cents (631); and the sequential number for the filing is 1, and '1' will therefore be the value of the final code (999).
