1 INTRODUCTION

This guidance explains the structure of the required inbound file and the check procedures that follow. For more information, see [General description for electronic filing of information returns \(pdf\)](#) (*tax.fi > About us > IT developers > Data format specifications > General description for electronic filing of information returns*).

2 DESCRIPTION OF THE INFORMATION FLOW AND SUBMITTAL OF FILES

More detailed guidance for completing the form is available on the Tax Administration's [Forms](#) page (*tax.fi > About us > Contact us > Forms*).

To check the method of identification required by this information flow, the required role and the place where the authorisation is checked, go to Ilmoitin.fi – [Methods of sign-in, Roles, rights to represent organizations](#) (*ilmoitin.fi > Instructions and templates > Methods of sign-in, Roles, rights to represent organizations > Income Tax Return > Name*).

3 MAKING CORRECTIONS

If you have submitted an income tax return electronically and notice some mistakes in it later, to remedy the errors, you must re-send (the main form) Form 6 with all the enclosures that contain corrections. In other words, you must send us the main form again although it does not have anything to correct.

4 PERIOD OF VALIDITY

This specification sets out the requirements of file formatting that become available on 6 February 2024 in Ilmoitin.fi in the live environment. They continue to be in force until a new version of this specification is released.

5 COMBINED INFORMATION FLOWS

See other information flows that can be sent in the same file as this one:

[Allowed combinations of forms for electronic income tax returns \(xlsx\)](#)
