Version history

Date	Version	Description
6 February 2024	1.0	First released version for the 2024 reporting year.

1 GENERAL DESCRIPTION

The purpose of this document is to describe the structure of submitted data and the checks carried out for records. In addition to this document, information is available in the [General description for electronic filing of information returns \(pdf\)](#) document (*tax.fi > About us > IT developers > Data format specifications > General description for electronic filing of information returns*).

2 DESCRIPTION OF THE INFORMATION FLOW AND SUBMITTAL OF FILES

This form is for business taxpayers and corporate entities to claim an additional expense deduction for R&D activities (under the act governing an additional deduction for R&D expenses (Laki tutkimus- ja kehittämistoiminnan lisävähennyksestä vuosina 2021–2025)). In addition, a written description of R&D activities to provide information on the expenses claimed must be enclosed.

All private traders and agricultural producers are entitled to the additional expense deduction who are engaged in research cooperation with a research organisation as defined by law. The additional deduction is 50% of the invoices for subcontracting, relating to cooperation within research work and linked to R&D activities. The deduction is made from business and agricultural income.

The maximum deduction is €500,000 and the minimum deduction is €5,000 for every tax year.

The amount of the additional deduction is also reported in the main tax return form in the calculation of taxable income or in another corresponding calculation.

Further instructions for completing the form are available on the Tax Administration's website at [Forms](#) (*tax.fi > About us > Contact us > Forms*).

To check the method of identification required by this information flow, the required role and the place in the flow where authorisations are checked, go to [Methods of sign-in, roles and rights to represent organisations](#) (*Ilmoitin.fi > Instructions and templates > Methods of sign-in, roles > Income Tax Return > Name*).

3 MAKING CORRECTIONS

Submitted electronic income tax returns can be corrected by re-submitting the main tax return form and all attached forms that include data to be corrected. In other words, together with the attached form with the corrections, you must send the main form again, even if it does not contain anything that needs to be corrected.

4 PERIOD OF VALIDITY

This specification sets out the requirements of file formatting and checking that come into force 6 February 2024 and continue to be in force until a new version of this specification is released.

5 COMBINING THIS INFORMATION FLOW WITH OTHER FLOWS

See other information flows that can be sent in the same file as this flow: [Allowed combinations of forms for electronic income tax returns \(xlsx\)](#) (*tax.fi > About us > Information and materials about taxation > IT developers > Data format specifications > Income tax returns > Permissible combinations*).
