

Canceling a Power of Attorney – private individuals

This guide explains the steps you need to take when you cancel an online Power of Attorney that you as a private individual have previously approved after your agent had created it.

When the Power of Attorney was originally created and made active, you approved it and received a confirmation message. As you can see in the illustration below, there is an e-mail link in the confirmation message that you can click in order to look up the POA, examine its status or cancel it. Cancelling a POA online requires that you either have a personal set of e-banking identifiers or a personal microchip identity card.

If you cannot sign in to Katso you always have the option to visit a tax office handling [Katso registrations](#) to prove your identity and cancel the Power of Attorney. You should bring along the e-mail confirmation message or a summary printout of the POA where its code is printed.
