

How to save Katso one-time password file with Safari and Windows operative system (latest version 5.1.7)

If you have no printer available, this is how you can save the list of one-time Katso passwords onto your computer.

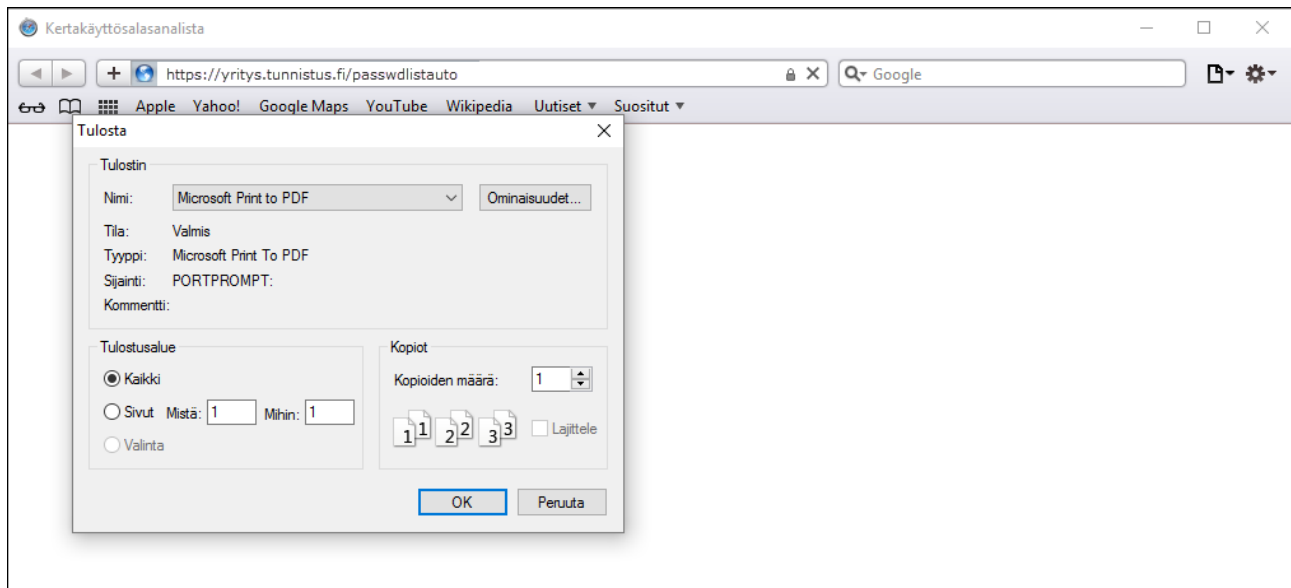

Kertakäyttösalasanalista

Valitse salasanojen lukumäärä [Tulosta](#)

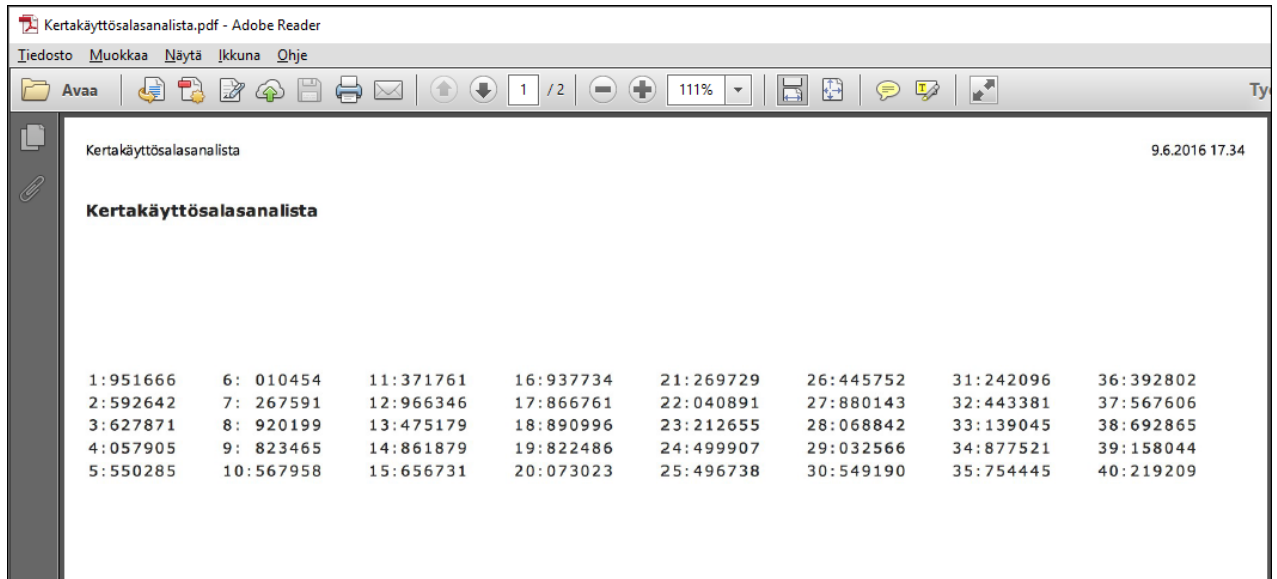

On the screen Identifier details, under List of one-time passwords, click Print.

Click OK to confirm that you wish to print out and activate the list.

Print the list on a document printer into a file, such as a pdf or xps document.

Save the file under a suitable name. Close the screen with the one-time passwords and return to the Identifier details screen. The new list of one-time passwords is now active. Log out from Katso.
