## 1 DESCRIPTION OF THE EXAMPLE

This example describes the process of reporting data on work abroad, when a person works in Germany and the six-month rule applies to the wages, due to which the payer does not withhold tax from the wages. Wages for insurance purposes have been defined for the income earner and reported to the Incomes Register. In the same report, the payer reports the NT2 data in the Forms for working abroad (WorkForm) data group.

The employer has a valid pension insurance policy with an earnings-related pension provider, so the earnings-related pension provider data and the pension policy number are submitted in the earnings payment report. As the employer has insured its employees in two different accident insurance companies, the accident insurance company details and policy number are also specified. Always check the instructions concerning the payment situation and enter all data matching the payment situation in question.

The data used in the example is not real. Always use correct data that matches the payment situation.
